OBJECTIVE

Front-End Engineer with a strong foundation in modern JavaScript, Web Components, and Progressive Web Apps (PWA). AWS-validated Full-Stack Developer with 8 professional certifications and 400+ hours of intensive project-based training. IDCamp 2025 Expert-Level graduate (AI Front-End Developer) from a selective program by Indosat & Dicoding. Specializes in building scalable, accessible, and high-performance user interfaces using Lit, Web Components, Bootstrap 5, and Sass. Proven ability to integrate real-time client-side AI (TensorFlow.js) and deploy production-ready applications via CI/CD pipelines. Passionate about delivering user-centric web solutions that drive measurable business impact.

TECHNICAL SKILLS

Front-End Development:

JavaScript (ES6+), Web Components (Lit 2, Custom Elements, Shadow DOM), PWA (Progressive Web Apps), Webpack 5, Babel, Bootstrap 5, Sass/SCSS (7-1 Pattern), Axios (Interceptors, Auth Headers), Fetch API, Async/Await, WCAG (Accessibility), Responsive Web Design (Mobile-First), Multi-Language (i18n) dengan @lit/localize, ESLint (Airbnb Style).

Back-End Development:

Node.js, Hapi.js, RESTful API Design, Server Deployment.

Cloud & Deployment:

AWS EC2 (SSH, Deployment), Firebase Hosting, GitHub Actions (CI/CD), Netlify, Vercel, GitHub Pages.

AI & Machine Learning:

TensorFlow.js (Computer Vision, Client-Side Inference), Scikit-learn (KNN, Decision Tree, Regression, Classification).

Tools & Others:

Git, Postman (Automated Testing), Lighthouse Audits, Web Animation API.

EXPERIENCE

Marketing & Sales Operations

12/2015-12/2016

PT Columbus Megah Adisaran

Indramayu

- Managed end-to-end sales operations for one of Indonesia's largest furniture and electronics retail chains (Cash & Credit system).
- Analyzed customer purchasing patterns and market trends to develop targeted acquisition strategies, directly contributing to a 15% increase in monthly team sales targets.
- Processed credit applications and performed financial eligibility assessments for buyers, strengthening data-driven decision-making and risk analysis skills.
- Collaborated with cross-functional teams to maintain high customer satisfaction and retention rates.
- Transferable competencies: Sharpened analytical thinking, stakeholder negotiation, and user-need identification—foundational skills now applied to building effective, user-friendly web applications.

EDUCATION

AI Front-End Developer – Level Expert (IDCamp 2025)

2025-2026

Dicoding Academy & Indosat Ooredoo Hutchison

Bandung

- Selected for a prestigious coding scholarship program by Indosat & Dicoding.
- Achieved the highest level (Expert/Mahir) with 140 hours of intensive project-based training.
- Coursework: AI Integration (TensorFlow.js, Computer Vision), PWA, Web Components, Webpack, WCAG, and modern web deployment.
- Graduated with Distinction.
- Certificate No.: IDCAMP2025/L3-FE-029

Professional Full-Stack JavaScript Developer (AWS Validated) Professional Full-Stack JavaScript Developer (AWS Validated)

2025-2026

Dicoding Academy & Amazon Web Services (AWS)

Bandung

- Completed 400+ hours of intensive, industry-standard training covering end-to-end web development.
- Successfully passed rigorous final exams and hands-on project submissions, earning a Distinction-equivalent CGPA.
- Core modules: Back-End Architecture (Node.js, AWS EC2), Front-End Engineering (PWA, Web Components, Webpack), and AI Integration (TensorFlow.js).
- Earned 8 professional certifications including Back-End JavaScript with AWS (Node.js, Hapi, RESTful API deployment on Amazon EC2), Fundamental Front-End (Web Components, Webpack, Fetch API), Intermediate Web (PWA, WCAG, Animation API), and AI Integration (Computer Vision & Generative AI using TensorFlow.js).
- Passed rigorous final exams and hands-on project submissions (Bookshelf API, modular web apps, real-time AI classifiers).
- CGPA equivalent: Distinction.

PROJECTS

Story App – Front-End Developer (SPA with Web Components & CI/CD)

05/2026-09/2026

Dicoding Academy (Personal Capstone Project)

1 Developer

Tech Stack: Lit 2, Web Components, Webpack 5, Bootstrap 5, Sass (7-1), Axios, Firebase Hosting, GitHub Actions.

- Built a fully responsive Single Page Application (SPA) for sharing stories with dynamic data from the Story API (Dicoding).
- Implemented authentication system (Login, Register, Logout) with token storage in localStorage and Axios interceptors for

Authorization headers.

- Developed reusable UI components using Lit 2 (Web Components) with Shadow DOM encapsulation.
- Configured Webpack 5 from scratch (common, dev, prod configs) with Sass/SCSS 7-1 Pattern for scalable CSS architecture.
- Integrated @lit/localize for multi-language support (English/Indonesian) with XLF translation files.
- Set up CI/CD pipeline with GitHub Actions for automated deployment to Firebase Hosting and GitHub Pages, including preview URLs for Pull Requests.
- Enforced code quality with ESLint (Airbnb Style) and Babel transpilation for cross-browser compatibility.
- Result: Achieved a modular, maintainable, and production-ready codebase deployed on two hosting platforms.

Live Demo:

- Firebase: <https://story-app-starter-5d1a2.web.app>
- GitHub Pages: <https://kusanadi34.github.io/story-app-starter/>

AI-Powered Computer Vision Web App – Front-End Developer

04/2026-06/2026

1 Developer

Dicoding Academy (Personal Capstone Project)

Tech Stack: TensorFlow.js, PWA, Web Components, Service Worker, Netlify

- Developed a real-time object classification PWA that runs AI inference directly inside the browser using a pre-trained TensorFlow.js model (zero server dependency).
- Engineered a custom Web Component architecture with Shadow DOM, achieving a 95/100 Performance score on Google Lighthouse.
- Implemented Service Worker & Cache API to enable 100% offline functionality and a fully installable mobile experience.
- Result: Successfully reduced initial load time by 40% through optimized asset caching strategies.

Live Demo: <https://profound-tartufo-7b847a.netlify.app/>

Modular Front-End App – Front-End Developer

02/2026-02/2026

1 Developer

Dicoding Academy (Personal Capstone Project)

Tech Stack: Web Components, Webpack, Fetch API, GitHub Pages.

- Built a component-based SPA using pure Web Components (Custom Elements & Shadow DOM) without external frameworks.
- Configured Webpack from scratch as a module bundler to optimize JavaScript and CSS assets, reducing total bundle size by 35%.
- Consumed external REST APIs asynchronously using Fetch API with Async/Await, implementing proper error handling and loading states.
- Focused on clean, maintainable code structure and responsive UI design across all device breakpoints.

Live Demo: <https://kusanadi34.github.io/starter-project-webpack-story-1i/>

PROFESSIONAL SKILLS

- Full-Stack JavaScript & AI Web Development , Excellent
Mastery across the entire web ecosystem: Back-End (Node.js, Hapi, RESTful API, AWS EC2), Front-End (PWA, Web Components, Webpack, WCAG), and Client-Side AI (TensorFlow.js, Computer Vision). Proven by 8 industry certifications (AWS-validated) and 400+ hours of project-based learning, including live-deployed applications on Netlify, Vercel, Firebase Hosting, and AWS.
- Front-End Engineering & Modern Architecture , Excellent
Expert in building scalable, maintainable, and performant front-end applications using :
 - Web Components (Lit 2) – reusable, encapsulated UI with Shadow DOM.
 - Webpack 5 – custom bundler configuration (common, dev, prod).
 - Sass/SCSS (7-1 Pattern) – enterprise-grade CSS architecture.
 - Bootstrap 5 & Tailwind CSS – rapid responsive UI development.
 - Axios – HTTP client with interceptors for secure API communication.
 - CI/CD with GitHub Actions – automated deployment and PR previews.
 - ESLint (Airbnb) & Babel – code quality and cross-browser compatibility.
 - TypeScript – type-safe JavaScript development.
 - @lit/localize – internationalization (EN/ID) with XLF files.
- Back-End Engineering (Node.js, AWS EC2, RESTful API) , Good
Built and deployed production-ready RESTful APIs using Node.js and Hapi framework. Experienced in server deployment, SSH configuration, and automated testing via Postman on Amazon EC2 infrastructure.
- Client-Side AI Integration (TensorFlow.js, Computer Vision) , Good
Integrated pre-trained AI models directly into web browsers for real-time object classification (Computer Vision) without server dependency. Leveraged TensorFlow.js and Web APIs for efficient client-side inference.
- Machine Learning (Scikit-learn, KNN, Decision Tree, Regression) , Good
Built classification, regression, and clustering models on tabular data. Experienced in feature engineering, hyperparameter tuning, and model evaluation to prevent overfitting.

LANGUAGES

- English , Good
- Indonesian , Excellent
