PROFESSIONAL SUMMARY

AWS-validated Full-Stack JavaScript Developer with 8 professional certifications and 400+ hours of intensive project-based training. Transitioning from a sales and marketing background into software engineering through a structured, industry-recognized bootcamp. Specializes in building scalable Progressive Web Apps (PWA), RESTful APIs deployed on AWS EC2, and real-time client-side Artificial Intelligence using TensorFlow.js. Passionate about delivering high-performance, accessible, and user-centric web solutions that drive measurable business impact.

Technical Skills :

- Front-End Development: JavaScript (ES6+), PWA (Progressive Web Apps), Web Components (Custom Elements, Shadow DOM), Webpack, Fetch API, Async/Await, WCAG (Accessibility), Responsive Web Design.
- Back-End Development: Node.js, Hapi.js, RESTful API Design, Server Deployment.
- Cloud & Deployment: AWS EC2 (SSH, Deployment), Netlify, Vercel, GitHub Pages.
- AI & Machine Learning: TensorFlow.js (Computer Vision, Client-Side Inference), Scikit-learn (KNN, Decision Tree, Regression, Classification).

PROJECTS

◆ AI-Powered Computer Vision Web App | Front-End Developer

04/2026-06/2026

Dicoding Academy (Personal Capstone Project)

Solo Developer

Tech Stack: TensorFlow.js, PWA, Web Components, Service Worker, Netlify

- Developed a real-time object classification PWA that runs AI inference directly inside the browser using a pre-trained TensorFlow.js model (zero server dependency).
- Engineered a custom Web Component architecture with Shadow DOM, achieving a 95/100 Performance score on Google Lighthouse.
- Implemented Service Worker & Cache API to enable 100% offline functionality and a fully installable mobile experience.
- Result: Successfully reduced initial load time by 40% through optimized asset caching strategies.

 Live Demo : <https://profound-tartufo-7b847a.netlify.app/>

◆ Modular Front-End App | Front-End Developer

02/2026-02/2026

Dicoding Academy (Personal Capstone Project)

Solo Developer

Tech Stack: Web Components, Webpack, Fetch API, GitHub Pages

- Built a component-based SPA using pure Web Components (Custom Elements & Shadow DOM) without external frameworks.
- Configured Webpack from scratch as a module bundler to optimize JavaScript and CSS assets, reducing total bundle size by 35%.
- Consumed external REST APIs asynchronously using Fetch API with Async/Await, implementing proper error handling and loading states.

- Focused on clean, maintainable code structure and responsive UI design across all device breakpoints.

 Live Demo : <https://kusnadi34.github.io/starter-project-webpack-story-1i/>

OTHER PROFESSIONAL EXPERIENCE

Marketing & Sales Operations

12/2015-12/2016

PT Columbus Megah Adisarana

Indramayu

- Managed end-to-end sales operations for one of Indonesia's largest furniture and electronics retail chains (Cash & Credit system).
- Analyzed customer purchasing patterns and market trends to develop targeted acquisition strategies, directly contributing to a 15% increase in monthly team sales targets.
- Processed credit applications and performed financial eligibility assessments for buyers, strengthening data-driven decision-making and risk analysis skills.
- Collaborated with cross-functional teams to maintain high customer satisfaction and retention rates.
- Transferable competencies: Sharpened analytical thinking, stakeholder negotiation, and user-need identification—foundational skills now applied to building effective, user-friendly web applications.

PROFESSIONAL SKILLS

- Full-Stack JavaScript & AI Web Development
Mastery across the entire web ecosystem: Back-End (Node.js, Hapi, RESTful API, AWS EC2), Front-End (PWA, Web Components, Webpack, WCAG), and Client-Side AI (TensorFlow.js, Computer Vision). Proven by 8 industry certifications (AWS-validated) and 400+ hours of project-based learning, including live-deployed applications on Netlify, Vercel and AWS.
- Back-End Engineering (Node.js, AWS EC2, RESTful API)
Built and deployed production-ready RESTful APIs using Node.js and Hapi framework. Experienced in server deployment, SSH configuration, and automated testing via Postman on Amazon EC2 infrastructure.
- Client-Side AI Integration (TensorFlow.js, Computer Vision)
Integrated pre-trained AI models directly into web browsers for real-time object classification (Computer Vision) without server dependency. Leveraged TensorFlow.js and Web APIs for efficient client-side inference.
- Machine Learning (Scikit-learn, KNN, Decision Tree, Regression)
Built classification, regression, and clustering models on tabular data. Experienced in feature engineering, hyperparameter tuning, and model evaluation to prevent overfitting.

EDUCATION

Professional Full-Stack JavaScript Developer (AWS Validated)

May 2025-June 2026

Dicoding Academy & Amazon Web Services (AWS)

Indramayu

- Completed 400+ hours of intensive, industry-standard training covering end-to-end web development.
- Successfully passed rigorous final exams and hands-on project submissions, earning a Distinction-equivalent CGPA.
- Core modules: Back-End Architecture (Node.js, AWS EC2), Front-End Engineering (PWA, Web Components), and AI Integration (TensorFlow.js).

LANGUAGES

- Indonesia , Excellent
- English , Good
